# **Compounded Semaglutide Sublingual(Oral) Drops for Weight Loss (1mg/ml)**

Semaglutide is a GLP-1 agonist that has been used in helping patients with type 2 diabetes control their blood sugar for several years. It is marketed as the injectable known as Ozempic® and as an oral tablet as Rybelsus®. The FDA recently added an additional indication to the drug, allowing it to help patients battling chronic weight management. Hazle Compounding Pharmacy has formulated a compounded liquid sublingual (under the tongue) form of this drug.

- **Safer and Easier than dreaded injections**
- **Oral dosing under the tongue**
- **Cost Effective**
- **No Prior Authorization or Insurance Needed**
- **Starting dosage is 0.3 mg (0.3ml) to 0.5mg (0.5ml) under the tongue once daily (hold for at least 90 seconds). After a few days increase to 1mg (1ml) once daily**
- **The cost is \$189.00. This supply will last from 1-3 months depending on the directions from your licensed prescriber.**

All compounded medications are available by prescription only from your physician, nurse practitioner, or physician's assistant. Before considering Semaglutide, it is important to talk with your healthcare provider to see if it is the right choice for your individual health needs.

Prescriptions can be phoned (800-213-0592); faxed (800-400-8764) or e-prescribed to Hazle Compounding.
